Art Unit 125

Claims 1-2 are rejected under 35 U.S.C. 112, first paragraph, as the disclosure is enabling only for claims limited in accord with page 1, line 25. See MPEP 706.03(n) and 706.03(z). "Administering" is broader than i.m. and i.v.

The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) and (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 1-4 are rejected under 35 U.S.C. 103 as being unpatentable over the admitted facts of page 1. It would be expected that a sedative/analgesic would have activity in any animal. It is also noted that "mammal" broadly stated in claim 1 clearly includes any prior art animal.

The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) and (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 1-4 are rejected under 35 U.S.C. 103 as being unpatentable over Chem. Abst. The compounds is taught as therapeutically old. The open form of the host is readable on the intended host for the prior art use. Accordingly, the claims are not patentable, the specific use notwithstanding.

The formula of page 1 appears in error.
